3.1

What is Requirement?

Normally, a software goes through ----

- **Requirements**
- **Analysis**
- **Design**
- **Implementation**
- **Integration**
- **Maintenance**
- **Retirement**

Which is the most important?

What is Requirement?

- *Misconception*

- *Must determine what client **wants***

- **Must determine client's *needs***

Three levels of Requirements

- **Passive ---- client leads developer**
- **Active ---- developer leads client**
- **Leading ---- e.g., Microsoft**
